Bachelor of Nursing

Summary:

I have had the privilege to be a part of multiple student, short films and an independent feature film. These experiences have allowed me to understand what it is like to work on set and the great teamwork that goes into a production. I have always had a passion for creating and performing which stems from crafting my own amateur drama solo in high school and participating in a media film as multiple lead characters. Although I have some familiarity, I would love to broaden my experiences as much as possible and I am open to new learning, which I think is the key to pursuing my future goals in film/tv and theatre. I am interested in acting bit parts and lead roles in both film/tv and theatre.

My positive attributes: I have a strong sense of teamwork and a hardworking attitude and being professional and punctual is important to me.
